The World of Wheat.

By H. G. L. Strange, Director Research Department, Searle Grain Co. Ltd.

The Canadian Seed Growers' Ass'n met toward the end of June for its 38th annual convention.

Thousands of farmers no doubt will have read this announcement in the press, and will think perhaps it is of little or no concern of theirs.

The fact is, however, that if 38 years ago the late Dr J W Robertson, the late Sir William C MacDonald and Mr G H Clark, who until recently was seed commissioner of Canada, it is quite probable that Canada would not have the reputation it enjoys today on World's markets; that consequently much less wheat each year would have been exported; therefore much less produced; hence that the population of Western Canada would be considerably smaller than it now is.

Members of the Canadian Seed Growers' Ass'n for 38 years have maintained in a pure state such important varieties as Red Fife and Marquis wheats, and have made large quantities of pure seed of these varieties available to farmers at reasonable prices.

This Association deserves well of every farmer, and of all those who depend upon farmers for a living, in western Canada, for it has made, thru the efforts of its members, vitally important contributions towards the advancement of Canadian agriculture.

A "Movie" Every Saturday.

The project, backed by the business men of Stony Plain, which guarantees that a good "movie picture" will be shown here every Saturday night, is meeting with a good reception. A sufficient guarantee for this has now been secured, it is said. A machine is to be purchased, and a down payment of about \$200 made, leaving a balance of \$3.50 to be paid. Admission will be the same as at present, with this difference—patrons of the local business places will be able to procure from their merchants tickets entitling adults to secure admission for about half price. The machine will be a 16MM class, and a good line of films has been guaranteed.

From the Drouth Area.

Mr and Mrs Hauser and family, of Scapa, Alta., are visiting at present at the Bartsch home. Mr Hauser is from the "drouth" area, but says the crops down his way are looking good, just now. This is his first visit to that part of the province, and he likes the looks of things here. Mr Bartsch was formerly a neighbor of his in the Scapa district, and moved up to the Stony Plain district several years ago and located on the John Gietzinger farm on Jasper Hiway. Scapa is 17 miles from Hanna.

Another Pool Hall.

Owing to the adverse vote given by the local ratepayers regarding the purchase of the old bank building on Main street, Mr William Barth is going ahead with his proposed alterations on the main deck of the building. This will be the pool hall and billiard parlor. A part of this floor has been set apart for a barber shop.

The pool hall will be operated by Mr Barth himself, while the hair dressing parlor will probably be run by Mr Wm Kotscherofsky.

Mr Barth expects to have the place open for business about the 1st of August, with 8 tables ready for the clientele.

HARDWICK'S

YOUR HOME TOWN STORE.

Long-wearing Silva Rayon Hosiery; double sole and reinforced heel and toe; sizes 8 to 10. Plaza beige, bluish glo, light gunmetal. 25c pair.

Rayon Bloomers; elastic at waist and knees; small, medium, large. Each 39c.

Rayon Striped Vests; small, medium, large; colors, White and Peach. Each 39c.

Mosquito Netting; offers better protection than the average netting; green or red. 10c yd.

Men and Boys' Zipper Pants. Men's sizes, 30 to 40, \$1.50 each; Boys' sizes, 10 to 16 years, \$1.25 each.

Men's Dress Caps, made in the popular 1-piece top style with good quality lining; sizes 6 7-8 to 7 1-2. Each \$1.

Table Oilcloth, new designs; 45 inches wide 39c per yard; 54 inches wide, 49c yard.

Trees To The Rescue

With the drought now definitely broken, over the greater part of the prairie provinces and prospects of a period of more abundant moisture apparently bright, the time appears to have arrived when further consideration might well be given to the advantages of a definite and well coordinated program of tree planting throughout sparsely treed and tree denuded areas as a rehabilitation measure.

It is noted, of course, that tree planting is included as one of the items in the rehabilitation program outlined two or three years ago as part of the Prairie Farm Rehabilitation program but to date comparatively little has been heard of this item, attention so far having been mainly centred on the construction of durguts, dams and minor irrigation projects.

Undoubtedly tree planting will follow in many of the districts now being served or about to be served by recently constructed irrigation schemes as a matter of course, but there are still many areas and individual farms which for topographical and other reasons do not lend themselves to watering by feasible irrigation projects, but in these areas, also, there appears to be no reason now why tree planting should not be pushed ahead to the extent that available time and power permits.

A Valuable Aid

That trees, wherever they can be made to serve the purpose can play an important part in farm economics and can be made to go a long way, sometimes even under adverse conditions, towards ensuring sustenance on the farm has been simply demonstrated in many individual cases, as witness the following extract from the annual report of the Canadian Forestry Association, dealing with southern Saskatchewan conditions:

"Every district visited furnished striking proof of the possibility of the southern farmer becoming self-sustaining so far as home food supplies are concerned. Had the farm garden been a universal policy instead of being completely overlooked, or at best, in most cases, a haphazard venture, countless millions in food costs during the past nine years could have been avoided. Every farmer can grow his own needs anywhere throughout the south country, and no objective short of this is good enough, and nothing but sound educational progress can achieve it.

"At Piapot, on the main line of the C.P.R., in an area of nine failures of wheat, we visited a man who inside his place raised all his own needs this year—250 bushels of potatoes, all vegetables, many jars of small fruits, melons and even plums and apples. Every farmer in that area could have done the same had he a few years ago given the need of such things proper consideration."

Can Supply Requirements

Whether or not the Piapot farmer referred to in the foregoing extract had sufficient water available for his garden to take the place of rainfall during years when moisture was not sufficient to raise wheat crops, the Forestry Association's report does not say, but it does at least demonstrate that in years of normal precipitation every farmer in the country could supply his own table requirements practically the year round, provided he has the requisite shelter in the form of trees and hedges.

It is too late, of course, to plant trees this year, but it is not yet too late to prepare soil for a shelter belt to be planted next year; indeed, this advance cultivation and preparation is a requisite to a successful planting. This, as no doubt, most farmers know is stressed by the authorities of the Dominion Forestry Service who supply millions of trees free to farmers throughout the west every spring.

Mortality among man-planted trees in the drought areas of the west has been high during the drought period, but, at the same time, it is surprising how many trees have, with some care and attention, withstood the ravages of a long period of dry weather. They have not made much top growth, it is true, but they have rooted deeper and deeper to reach the dwindling moisture reserves and now these trees are responding again to more copious precipitation.

Opportunity Again Here

The experience of others demonstrates that the mortality of the drought years need not act as a deterrent to the planting of trees on the farm. On the contrary it goes to show that, even during a dry period, they are of immense benefit and with the drought now presumably broken it should afford every encouragement to the individual farmer to take active steps to provide at least for some of his needs in future years, by establishing a good shelter belt at the first opportunity his circumstances permit.

It should further be pointed out that there are many farmers, even in the drought areas, who had sufficient water to maintain a garden, if in earlier years they had provided the necessary shelter for vegetables and fruit trees. This omission can now be repaired in many cases and with the return of a period of greater precipitation it looks as if the time has arrived when trees should be planted more abundantly.

STOP Scratching
It RELIEVES ITCHING IN A Minute
From the most stubborn itching of the skin, including eczema, urticaria, hives, and other skin eruptions, quickly yields to the relief of the famous D. O. D. PRESCRIPTION. The powder the world has tried and found it the most effective remedy for itching. It is the only relief. Stop the most intense itching instantly. A little will last. Clear, smooth, healthy skin in minutes. Ask for D. O. D. PRESCRIPTION. 25

An Illustrated Lesson

To impress on its employees the careful handling of freight shipments, the Great Western Railroad of England distributed 22,000 jigsaw puzzles to them. On working out the puzzle, they see a picture of a little boy in tears as he examines a battered toy he's just taken from a broken packing case.

Men marry at an average age of 27 1/2 years. 2263

Wheat Market In Europe

Want To Accumulate Reserve Stocks In Event Of War

Foreign trade experts of the United States agriculture department said that unsettled political conditions in Europe might open new and larger markets for surplus American wheat during the next 12 months.

Prospects for larger sales in Europe were indicated, they said, by the recent decision of Great Britain and The Netherlands to accumulate reserve stocks of the grain in preparation for a possible outbreak of war.

Foreign trade authorities said other European powers were known to be considering similar action. The Netherlands has begun establishment of a system for maintaining at least two months' supply of wheat at all times. Grain importers and dealers would be held responsible for maintaining such stocks with subsidy assistance from the government. Little is known about the British plan.

Trade experts estimated that European wheat imports for consumption needs during the next year would be about 450,000,000 bushels or about 50,000,000 more than during the last 12 months. Reserve stocks were not included in the estimates.

The proportion of possible reserve purchases of wheat in America would depend largely on prices, officials said, pointing out that the American price was above the world level. Buyers might go elsewhere.

Official crop reports indicate that Canada and Argentina may produce 125,000,000 bushels more than last year. French statistics show that amount probably would be sufficient to meet the most optimistic increase in world import requirements.

Must Develop North

Should Be Utilized To Hold It For The White Man

Canada must develop and utilize its northland to hold it for the white man, W. D. Albright, superintendent of the Dominion experimental farm station, Beaverbridge, Alta., warned the American Association for the Advancement of Science in annual convention.

Like Russia, Canada must look to the north and the United States will follow its progress with satisfaction, he said. "For a particular reason of her own very proper concern, the United States must be interested in the Dominion's conquest of the north. In the modern surge of racial expansion, in the mad quest for economic self-sufficiency, in the race of armaments and in the unscrupulous scramble for a 'place in the sun,' which seems often to mean territorial expansion, is it to be supposed that the northern third of this continent can be held by the white man unless developed and utilized by him? What of Asia?"

SELECTED RECIPES

FRESH CHERRY JELL-O TARTS

1/2 cup sugar
1 quart fresh sour cherries, pitted
1 package Cherry Jell-O
1 cup hot water
1 cup cream, whipped
9 baked 3 1/2-inch tart shells
Add sugar to cherries and let stand 10 minutes. Dissolve Jell-O in hot water. Pour over cherries. Chill until Jell-O begins to thicken. Fold 4 tablespoons thickened Jell-O into whipped cream. Chill. Place layer of whipped cream in bottom of each tart shell and chill about 10 minutes. Cover with layer of jellied cherries, pressing stem-end of each cherry lightly into cream. Add thickened Jell-O to all shell. Chill a few minutes longer and serve plain or with topping of additional whipped cream. (Custard cream filling may be substituted for whipped cream in bottom of tart shells.)

MELON AND RASPBERRY SALAD

1 package Lemon Jell-O
1 pint hot water
1 cup cantaloupe or honeydew melon, cut in 1/2-inch balls.
1 cup fresh raspberries
Dissolve Jell-O in hot water. Chill. When slightly thickened, fold in melon balls and raspberries. Turn into ring mold. Chill until firm. Unmold. Serves six.

The Evening Of Life

For the complete life, the perfect pattern includes old age as well as youth and maturity. The beauty of the morning and the radiance of noon are good, but it would be a very silly person who drew the curtains and turned on the light in order to shut out the tranquility of the evening.

Sold only in the red and yellow packages. Never sold in bulk.

Christie's Biscuits
"There's a Christie Biscuit for every taste"

The Spirit Of China

Was Shown In Gift Sent By Madame Chiang Kai-Shek

In June, 1917, a war year for the United States, the present Mme. Chiang Kai-Shek, as a daughter of the famous Chinese Soong family, was graduated from Wellesley College.

June 18, 1938, Mme. Chiang's classmates held their annual reunion on the shores of Lake Waban. But 1938 is a war year for China, and Mme. Chiang could not attend.

Instead she sent a gift of silver spoons, which were used at a reunion tea. While she sent a message that through her gift she would feel that she was sharing in the festivities, she added that the spoons are "to show that a spoon may be licked, but China can't."

Mme. Chiang's patriotism is characteristic of the new China which she and her generalissimo husband have helped to build, a new China which with old stoicism is doggedly defending itself in a war still undeclared. Her humor and love of subtle parable are likewise characteristic.

The western world should realize that these racial traits are not the least important of the weapons with which China fights an aggressor.—Detroit Free Press.

Full Operation Delayed

Shortage of equipment has held back full operation of Trans-Canada Air Lines, Hon. C. D. Howe, minister of transport, told the House of Commons. By Sept. 1 he hoped to see full operation of passenger, mail and express services between Vancouver, Toronto and Montreal.

How The Language Grows

Words Coined By Inventors Soon Come Into General Use

The word "television" was coined by J. L. Baird in 1925 to describe apparatus for television and was registered by him as a trade mark. On account, however, of the general adoption of the word in the United States and elsewhere to denote any kind of television apparatus, Baird Television, Ltd., has decided to abandon its registration as a trade mark, so that in future there will be no restriction upon the use of the word in connection with television. "Television" may thus be used in future as freely as "telegraph" and "telephone."

The word telegraph was first applied by Chappes in France, in 1792, to his invention of the semaphore system of transmitting messages to a distance; and the word telephone was used by Sudre in 1828 for a system of signaling by musical sounds. It was employed in 1844 to describe a powerful wind instrument to convey signals at sea during foggy weather. Philipp Reis, in 1861, called his ingenious instrument a telephone, so that he may be regarded as the inventor of the name of the modern instrument. Alexander Graham Bell adopted the word in 1876 for his "Electrical Speaking Telephone."—From Nature.

Fame Has Passed

Canadians at London's Dominion Day dinner learned the small room in the shadow of Westminster Abbey where their country's constitution, the British North America Act, was finally drafted more than 70 years ago had become a billiard parlor.

Standard QUALITY A NEW LOW PRICES

FROM the day it was introduced, the Firestone Standard Tire has more than lived up to its name by setting a new high standard of tire value. Thousands of car owners in all parts of Canada enthusiastically endorse it as the greatest tire Firestone ever built to sell at low prices.

Firestone Standard Tires give you everything you need — long mileage, extra safety, carefree, dependable service and economy. See the nearest Firestone Dealer today. Take advantage of Firestone's new low prices and equip your car NOW.

MOST MILES PER DOLLAR

Van-Side Billboards

Will Place Merits of Canadian Products Before British Consumer

The roar of British traffic will soon carry a message from Canada. In the most intensive and ambitious advertising effort of its kind ever attempted in England, the merits of Canadian foodstuffs are to be placed before the British consuming public by means of one of the most effective media known in the Mother Country—van-side billboards. Embellished in full color on the sides of 4,000 commercial motor vehicles, the message of Canadian business will for nine months be placed continuously and inescapably before the eyes of the British public. Persistent and striking, the "wheeled sales appeal" also has a mobility which carries it through city, town, market-place and hamlet, and into the farthest corners of the Isles.

Van-side billboards, which have been selected as one of the media by the directors of the Dominion Department of Trade and Commerce advertising campaign as a telling method of reaching the huge British market for Canadian foodstuffs, have no parallel among established North American advertising media. Buses which are conceded to have an unsurpassed value in the British field of advertising, are also being used as they become available. They now run into the hundreds.

This type of appeal has in the past been used with striking success by several other Dominions seeking to increase the British market for colonial imports, but no such effort has approached the proposed Canadian campaign in extent, intensity or duration. Extreme interest in the campaign is being evinced in advertising and commercial circles throughout Great Britain, and Departmental officials at Ottawa also are keenly interested.

Index System for Children

Ontario May Adopt Plan in Use in Calgary

A card filing system, similar to one established by the Calgary Medical Health Department in 1935—a complete record of every child born in Calgary—may be introduced in Ontario. Dr. B. T. McChesney, Ontario's deputy minister of public health said during a visit to Calgary.

The "follow-up" card index system for children was inaugurated Sept. 1, 1935, when the city and school health service amalgamated into one department under the direction of Dr. W. H. Hill, Calgary medical health officer. It provides a complete health record previous to the child entering public school and during school years.

Dr. McChesney, Ontario's deputy minister indicated he would endeavor to introduce the system in the eastern province.

Travelling Orange Tree

California Man Takes Tree Loaded With Fruit To World's Fair

An orange tree, nine feet high and bearing about five hundred oranges on its branches, crossed the Peace Bridge at Fort Erie, en route for New York. The tree is owned by Jesse Stubbs of Anaheim, California. It was taken from the ground just before it bore fruit, and placed in a truck together with 8½ tons of California soil. Mr. Stubbs said the tree had flourished in its travelling environment. He left Anaheim three weeks previously, and made some stops en route. He estimates that about one and a half million people have viewed the orange tree, 80 per cent of whom confessed they had never seen one before.

When he left Anaheim the tree had about seven hundred oranges. About two hundred have been given as souvenirs. It is to be shown at the World's Fair and crossed Ontario on No. 3 highway Windsor to Fort Erie.

A Three-Eyed Herring

A herring with three perfectly-formed eyes, the extra one on top of its head between the regular two has been caught by a fisherman at Grey-mouth, New Zealand. Thus fortified, the herring should have been better able to avoid capture than its two-eyed brothers and sisters. Either it did not use its eyes or it was a poor fish.

HITLER INAUGURATES GREAT RE-BUILDING SCHEME

The re-building of Berlin has begun at sixteen building sites under the direction of Herr Hitler. Our photograph shows Hitler laying the foundation stone of the new headquarters of the German foreign tourist traffic to inaugurate the scheme.

Not His Worry

Police Official Could Not Help Man With Stubborn Wife

We know of a police official of Goderich, Ont., who is in a somewhat bewildered state of mind these days. After many faithful years of service on behalf of the municipality of Goderich, Police-Sergeant A. C. Ross had come to have a pretty fair opinion of his own constabulary capacities. He had captured criminals, thwarted evil-doers, preserved the peace with notable success all this time, and he had got around to feeling that he was equal to any crisis that could possibly confront a police-sergeant in so normally law-abiding a community as Goderich. It will readily be understood, therefore, that he was badly let down the other evening when a motorist, parked by the curb, halted him with this astounding request:

"Officer, make my wife sit up in the front seat with me."

Police-Sergeant Ross, faced with so unusual a problem, was completely at a loss. Nothing in his experience or in the law, Dominion, provincial or municipal, as he knew it could guide him in such an emergency. A brief enquiry disclosed the fact that the wife, being angry with her spouse, not only refused to sit in the front seat with him, but declined absolutely even to speak to him.

Recognizing an impasse, Police-Sergeant Ross withdrew from his untenable position. "Man," he said, "you married her, not me. If you can't do anything with her, what on earth do you think I can do?" and went on about his business. But he feels that he will never be quite the same carefree officer he was before. —Maclean's Magazine.

Persistent Advertising

Only Way To Acquaint New Customers With Your Products

Roger Babson, who is a leading oracle on business problems, says: you might think that certain industries need not advertise. The movies, for example, are constantly in the public eye. The radio industry already has your ear, and the telephone industry is on every tongue. Nevertheless these industries have the wisdom to advertise persistently. Persistence is the very heartbeat of successful advertising. Statistics show the astounding turnover of customers. Advertisers realize that new customers are now coming into the market at the rate of about 6,000 every day. A message may be an old story to you, but every 24 hours there is a fresh group of 6,000 people who never even heard of you before. This is one reason why advertising should be continuous. Another reason is that an advertising message is like a nail; you cannot drive it home at the first stroke, but must hammer it home with a succession of strokes."

Must Take Things Easy

Lord Baden-Powell Cannot Do Any More Hard Work

Lord Baden-Powell, founder of the Boy Scout movement, has been told by his physicians he must be prepared to watch other do the hard work. In a letter to "The Boy Scouts' News," Lady Baden-Powell wrote commending efforts to increase the Scout fund, but said of her 81-year-old husband: "With a heart tired out with consistent overwork, his good turn can only be an arm-chair one."

Japan has 15 airplane manufacturing companies having a capital of \$1,000,000 or more.

Cure For Insanity

Apparent Cure Through Use Of Drug Reported In Britain

An apparent insanity cure through use of a drug has prompted the medical profession to view with increased mistrust the divorce law provision enabling a petition to cite incurable insanity as a cause.

The British Medical Journal cites the case of a woman who had been confined for seven years to an asylum, suffering from acute-onset (split personality) of a depressive type and whose husband was contemplating divorce proceedings against her.

Physicians decided to induce epilepsy by injections of pentavethylenetetrazol. The woman's condition improved immediately, both physically and mentally, so that she was scarcely recognizable as the same person."

She shows every promise of making a good recovery and her physical improvement is equally marked. All faultiness of habit has disappeared and she now takes pride in her personal appearance.

"So far she has had nine therapeutic seizures and treatment is still being continued."

Power Of Advertising

Demonstrating the power of advertising is the question most prospective home builders ask when they first approach an architect or contractor. Before they discuss plans or layout the big majority ask, "What about insulation?" Ten years ago, according to builders, most people didn't even know what the word meant.

It is estimated that aeroplanes are carrying more than a quarter of a ton of diamonds from the Kasai field in the Belgian Congo annually.

Blaming The Machine

Shows How Technological Progress Can Prevent Unemployment

The machines that can do man's work better, faster, and more efficiently than he can do it himself have had much publicity, and they are spectacular in their own right. It is obvious and natural to assume that these machines have taken away jobs—that they are, therefore, responsible for a large part of our unemployment.

But there is another side to it. At a recent meeting of the American Engineering Council in Philadelphia, Prof. Leo Wolman of Columbia University showed how technological progress can prevent unemployment at the same time that it causes it. The three industries which have undergone the least technological changes since the World War, said Prof. Wolman, are coal mining, building construction and railroading. That means, in simpler language, that there has been less displacement of men by machinery in these industries than in any other. Yet it was precisely these three industries, he continued, which recovered the least between the depth of the depression and the peak of recovery last year; it was also these three industries which suffered the greatest unemployment during that same period.

All of which compels us to re-examine this question of technological unemployment. Prof. Wolman's figures make it seem fairly obvious that—over the long pull, at least—labor-saving machinery does not permanently displace labor. It may for short periods, of course; but in the long run, it stimulates the industry involved, and industry generally, enough to take up the slack.

Conversely, the workers' job is not safeguarded if his industry fails to avail itself of technological advances. For the price of good health in this modern industrial community includes a searching unflinching attention to all possible avenues through which work may be done and goods produced at lower and lower unit costs. The worker gains little through the retention of old handicraft methods of work, if the very retention of these methods helps to sink his industry deeper into the depression.

It seems fairly clear that the real villain in the piece is not technology at all. We might more profitably hunt for it among the intangibles—among the fear and suspicion which interrupt foreign trade among the myriad national and international currents which produce fear in place of confidence, among the prejudices and blindness which keep men from getting along with one another harmoniously. By blaming the machine we are simply doing a poor job of trying to cover up our own shortcomings.—Victoria Times.

Translating Scriptures

Portions Of Gospel Translated Into Eskimo Dialect

Twenty years after leaving a Mackenzie River Mission to take a parish work in Ontario, Rev. C. E. Whittaker is translating portions of the scriptures into Eskimo dialect.

The manuscript of St. Luke's gospel, translated into the dialect of the Mackenzie River Delta Eskimo, will be published by the British and Foreign Bible Society in London, England. Dr. Whittaker has found useful as a tool a new testament translated into the dialect of the Baffin Land Eskimo by the late Rev. E. J. Peck, which was prepared through the help of scriptures translated by the Moravian Missionaries to Labrador.

For 23 years Dr. Whittaker was Archdeacon of the Anglican diocese of Mackenzie River. He retired from active duties as a clergyman several years ago.

Engaged now on translating the Acts of the Apostles into the dialect of the Mackenzie River Delta Eskimo, Dr. Whittaker submits his manuscript for approval before publication.

People Are Thrifty

Gateshead, which is situated on the south bank of the Tyne, opposite Newcastle, is one of the thriftiest places in the British Isles. In England and Wales the person in every 32 is a member of a National savings group. In Gateshead one person in every eighteen is a member. —2263

THE KING GEORGE V. MEMORIAL IN WESTMINSTER

Our photograph shows a model of the accepted design for the King George V. Memorial at Westminster. London, which gives a good idea of the position the memorial will occupy. Several buildings will be demolished to make room for it.

To Protect Newspapers

Distribution Company in London Prepared For Air Raids
Editor & Publisher, New York, says they now have an A.R.P. office in London—Air Raid Protection, we gather from a piece in the Newspaper World—which is mightily concerned with the welfare of journalism in the event of a hostile air attack. The Government has emphasized that "in an emergency the continued distribution of newspapers would be a vital factor in maintaining public morale."

To date, newspapers have not taken any specific precautions, but one of the largest newspaper distribution companies of the city has an elaborate program. Truck drivers and their assistants taking papers to railheads must wear clothing which will give reasonable protection against gas. Cheap wrapping paper will be used on bundles, to be discarded if contaminated by gas. Ten per cent. of the plant staff of 3,000 people will be highly trained in anti-gas, fire, and first-aid work. Field telephones have been acquired against a breakdown in the normal public service. Storm and bicycle lanterns have been provided should public lighting fail.

Alternative space has been arranged for every department so that the lodging of a bomb will not disrupt the organization, and bedrooms and canteen service will be ready to accommodate workers held in the building by a prolonged raid. The basement of the Central London building, several acres in extent, is being completely gasproofed as a shelter for the entire staff. And similar arrangements are being completed at all the firm's branch offices throughout England.

It is suggested also that newspapers' private wire systems be used as an auxiliary if a raid should damage the Post Office wires. The latter are being protected in many technical ways against destruction by bombs, with specially constructed buildings, duplicated services, and routing diagrams for connections around a damaged area.

Yes, London looks ahead—but to what?

U.S. Military Aircraft

Claim Made That It Is Superior To Rest Of The World

The United States army, placing a \$14,433,196 order for 98 fighting planes, took occasion to claim that the United States is superior to the rest of the world in designing military aircraft.

The planes ordered included 13 flying fortresses such as new in flying to Buenos Aires and return, 78 smaller bombers and seven stream-lined attack planes.

The planes are the first to be purchased out of the \$43,000,000 congress gave the Air Corps to buy 478 aircraft in the new fiscal year. About 700 new craft already were on order.

The army has some 1,400 first line planes in service now and expects to reach its goal of 2,320 of the most modern types two years hence, officials said.

The Earhart Light

Marks Tiny Howland Island Missed By Famous Flyer

A monument on a desert island and a prosaic ruling which established legal death, stood as reminders that just one year ago Amelia Earhart and Frederick J. Noonan vanished trying to fly across the vast South Pacific.

On tiny Howland Island, 1,500 miles southeast of Hawaii, a bone-white lighthouse tower—the "Earhart Light"—marks the sand spit where the aviatrix missed on a hazardous leg of her world flight.

A Real Expert

Two maids were conversing over the back fence of the suburban houses.

"I'm going to have my eyebrows plucked," said Tilly. "It's the fashion now, you know."

The other maid raised her eyebrows in surprise. "Oo," she said in wonderment, "won't that be very expensive?"

"No," said Tilly, putting on a refined air, "my boy friend who works at the poultry shop down the road is going to do it."

Connecticut first raised tobacco between 1640 and 1660. 2263

Steadiest in World

Australia's Marriage Rate Has Not Changed In 30 Years

Statistics reveal that Australians are the most stable marrying people in the world.

Neither the World War, the modern pace of living nor economic crises have changed their ideas on the subject, and their marriage rate is the same as in 1908.

The latest figures show 8.4 marriages per 1,000 of population. The only countries with a higher marriage rate now are Russia, South Africa, Germany, Denmark and Rumania. Italy is lower.

Get His Picture

But Effort Put Candid Camera Man In Hospital

The candid camera craze put Jack Bartlett, 46, Salt Lake City, in a hospital. Motorcycle Patrolman E. N. Olson said he agreed to let Bartlett take a "head-on" picture of him. The photographer got excited as Olson's motorcycle approached. He attempted to dodge, so did Olson. Bartlett suffered a brain concussion.

P.S. He got the picture.

NEW HIGH OR LOW-BACK SLIP

By Anne Adams

Definitely—this is a slip that's in a class by itself! The Pattern (No. 4842) will make you want to get your scissors out immediately—for it's so simple—and the illustrated step-by-step sewing instructions are so easy to follow. See how well shaped the front and back panels are, and how the bodice and shoulders are cut in one piece so that the straps will not slip down. It's a style to be your favorite, for it has a "smoothing" influence on the figure, and won't twist or bind. Make several slips in durable rayon or synthetic if you want your Summer and early Fall frocks to sit properly, without a wrinkle underneath to spoil their perfection.

Pattern 4842 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 takes 2 1/2 yards 39 inch fabric. Send twenty cents (20¢) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and telephone number and send order to the Anne Adams Pattern Dept., Winnipeg, New Brunswick, Canada, 175 McDermott Ave. E., Winnipeg.

SUNDAY SCHOOL LESSON

JULY 17

DEBORAH: EMERGENCY LEADERSHIP

Golden text: Who knoweth whether thou art not come to the kingdom for such a time as this? Father 4:14. Lesson: Judges 4:1-5:31. Devotional reading: Psalm 4:6-13, 8-11.

Explanations And Comments

Israel Oppressed by Sisera, Captain of Jabin, King of Canaan, Judges 4:1-3. Joshua's conquest of Canaan was incomplete, and many cities remained in the possession of the original inhabitants. There was no federation of the tribes against their common enemies within and round about. It was a rule, rough age, "Israel's Iron Age," as Dr. Marcus Dods aptly terms it. Several times a powerful enemy threatened to annihilate the Israelites, but each time, as the Judges who saved them out of the record says, "Jehovah raised up hand of them that despoiled them."

A great crisis then came. Jabin, King of the northern confederacy of the Canaanites, through Sisera, his commander-in-chief, had held for 20 years a military despotism over the northern district of Canaan. Nine hundred chariots of iron had him. There was danger that his power might grow till he regained the whole land and sealed Israel's doom.

Deborah's Challenge To Barak, Judges 4:4-7. "Here was a weak and struggling people, whose future was of immense consequence to the whole history of religion, charged with a mighty spiritual destiny, and in danger of just ceasing to be anything at all before they had even begun to be what they were meant to be. Their spirits were broken: these chariots drove across their very soil. If ever their leaders came together, there was no talk of Sisera, too strong for us; we have only foot soldiers, poorly armed. If we should rise against Sisera, he would only ride us down the more fiercely." And then, when the men were of no use at all, a woman stepped into the place of history" (Gaius Glenn Atkins).

The woman was Deborah, a prophetess and the judge of Israel at that time. She was accustomed to sit under a palm tree (therefore known as the palm tree of Deborah) to declare what was the judgment of God in national affairs, and to settle disputes among men.

With faith in God's directing hand as empowered John of Arc for France, Deborah summoned Barak and ordered him to raise a force of ten thousand men from the tribes of Naphtali and Zebulun and attack Sisera with his chariots and his multitudes at the River Kishon. Only two tribes were called because they were the most interested in defeating the oppressors, for their territory bordered the Plain of Esdraelon. "And I will deliver him unto thy hand"—Deborah is speaking in the name of Jehovah.

A Geographical Term

In Reality Place Named Budapest Does Not Exist

The name "Budapest" is an abstraction; it is purely a geographical and administrative term, meaning the Hungarian capital. In reality it does not exist. There is only the right side of the Danube River called Buda, and the left called Pest, and the two cities have been joined since about 700 years. Buda is 900 years old; Pest at most is 200. A lovely old bridge spans the river, and the man who built it was an English engineer, Adam Clark. His name is comparatively unknown in his country of origin; but in Buda there is a beautiful Old-World square called after him. Pest is pronounced "Pesh-t."

Who Are The Foreigners

There is a local station which forbids the sale of firecrackers to Americans in San Francisco's Chinatown.

A news reporter laughingly tells of an incident which occurred during a Chinese New Year's celebration. He wished to obtain some photographs of a Chinese girl holding strings of the firecrackers; so he dashed into a near-by store and loudly gave an order for them.

The portly Chinese in charge of the shop shouted back just as loudly, "We do not sell firecrackers to foreigners!"

(Which sounds something like the voluble reporter who said to the big Indian Chief, who had just come in to visit the Chicago World's Fair: "Well, Chief, what do you think of our country?")

On the first run of the new streamlined Twentieth Century to Chicago, the honored guests who were invited to make the initial ride swiped \$87 worth of finger-bowls as souvenirs.

Less than 2,000 of England's 70,000 blind are under 16 years old.

For Your Preserving

Use It This Year

Always Gets It Back

Conductor Has Lent Thousands Of Dollars To Passengers

History has it that a party named Diogenes once conducted an exhaustive but vain search for some honest folk. It seems a pity that Diogenes did this so long ago because there's a conductor around Chicago who could have put the lantern-bearing ancient on the right track by pointing out passengers on a railroad train.

The modern conductor is John L. Reece, who in his 45 years of service with the New York Central System has lent thousands of dollars to financially embarrassed train riders, and has never lost a cent of his investment in faith in human nature.

During the Century of Progress Exposition, for example, Reece produced the means for 17 passengers to get back home. Various events brought these 17 to their predicament, such as a lost purse, a picked pocket or perhaps too grand a time for the extent of their resources.

They'd come up to me at the gate in the Le Salle Street Station," said Reece, who is a conductor on the Twentieth Century Limited "And ask me how they could get home. I'd tell 'em to get on the train—and I'd advance the fare. They all returned the money to me, with nice letters of appreciation."

On one occasion Reece lent \$300 to a woman who was on her way to California from New York. She'd exhausted her funds and didn't have cash enough for breakfast. Reece took care of that, scurried around among his friends in the station and gathered \$300 for his passenger.

"She wanted to give me a couple of diamond rings for security" Reece smiles. "But I didn't want to be bothered. A few days after I had the money back with an extra \$50—and when I visited California a big car was at my disposal."

Runaway youngsters, old ladies carried past their station or on the wrong train—like the one who became confused at Elkhart and took the Century thinking she was getting on the "old road" local train which stood alongside—Reece has dug into his pockets hundreds of times to care for them. And never had reason to regret it.

Miss, famous as the laziest cat in the world because it would not get up to lap a saucer of milk, but instead dipped in its paw then licked the paw, has died in Odense, Denmark, birthplace of Hans Christian Andersen the fairy-tale writer.

Karl: "So your baby is sick. What seems to be the matter with it?"

Jack: "Almost everything, I guess, except sleeping sickness."

Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at one may secure same by writing to: The Health League of Canada, 165 Bond St., Toronto, Ont.

Once you sweeten your morning cereal with BEE HIVE

Syrup you'll know how good cereal can taste.

TRY IT TOMORROW

WORLD HAPPENINGS BRIEFLY TOLD

Lord and Lady Tweedsmuir will arrive in Vancouver Sept. 1 to commence their tour of British Columbia, civic officials said.

Last stronghold for men in the British Broadcasting Corporation staff, the research department now has been invaded by women appointed as secretaries or typists.

Captain Ambrose Norris, 50, of the schooner Granite, out of St. John's, Nfld., was washed overboard at the mouth of Trinity Bay. His body was recovered.

Western Canada's war on the grasshopper may be aided some day by a little bee-fly from the Argentine, being experimented with now in the Dominion entomological department's laboratory at Belleville, Ont.

Appointment of D. H. McCallum, Regina, as chief dairy instructor and inspector in the dairy branch of the Alberta department of agriculture, was announced by Hon. D. B. Mullen, minister of agriculture.

According to the China Weekly Review 3,500,000 Chinese boys and girls are being trained for war in national resistance camps, the boys as soldiers and the girls as nurses and other aid.

To avoid service in the National Guard, Carl Winkler, 24, Detroit, chopped off his right hand with an axe, police said. Winkler joined the Guard a month ago, and attended two meetings.

Collections of income tax for the three-month period April 1 to June 30, 1938, amounted to \$101,521,476 compared with \$81,728,659 in the corresponding period of 1937, a net increase of \$19,792,817, the national revenue department announced.

Playing For Time

Every Day War Is Postponed Makes It Less Likely

As President Benes of Czechoslovakia says, time works for peace. Every day of postponement must bring more careful calculations of chances, every day of preparation shows the picture of war in a more terrible light, and every new addition to the horrors of current wars helps to consolidate at least the opinion of the democratic nations against the aggressors. War may still come, if it is avoided, the world will owe thanks to the statesman, who, in the face of bitter attack, secured it time to think.—Toronto Telegram.

An Intelligence Test

Here is a simple "intelligence test":

A man planted a lily in his pot. The next day there were two lilies and each day the number doubled. At the end of 30 days the pot was full. On which day was the pot half-full?

Time allowed for solution half-minute.

FEET HURT?

Connecticut first raised tobacco between 1640 and 1660. 2263

MAKES A RULING AGAINST PADLOCK DISALLOWANCE

Ottawa.—Justice Minister Ernest Lapointe is not prepared to recommend that the government disallow Quebec's padlock act, nor is he disposed to recommend a reference on the constitutionality of the legislation to the supreme court of Canada. This decision was contained in a ministerial report rendered to the governor-in-council by Mr. Lapointe.

While the validity of the act is a proper subject for determination by the courts, Mr. Lapointe's opinion is that action should be based upon a "concrete case" rather than upon the submission to the supreme court of Canada of an abstract question.

The padlock law, officially described as "an act to protect the province against Communistic propaganda," was passed at the 1937 session of the Quebec legislature. It provided that buildings where Communist literature or propaganda was found could be padlocked by authorities.

First action under the law was taken last November when the office of the weekly Montreal newspaper "Clarinet" was raided and padlocked. Later the Montreal office of the Toronto daily newspaper "The Clarion" was raided and 700 copies of the paper, along with other publications and documents, seized. Several book stores and print shops also have been raided.

The minister's opinion, rendered one day before the expiry of the statutory one year's period within which the Dominion may exercise its right of disallowance, is a lengthy document. The 15 sections of the act are cited, and their purport explained.

Mr. Lapointe then dealt with a petition received last January from the Canadian Civil Liberties Union, Montreal branch, which asked that the statute be disallowed.

"Numerous other protests and representations against this measure were also received by the government from various organizations and individuals throughout Canada, but located or residing for the most part outside of the province of Quebec," the minister said.

Copy of the petition was sent to Premier Maurice Duplessis of Quebec with the invitation he submit whatever representations he might desire on the subject.

"Subsequently," the minister reported, "the petitioners having expressed a desire that counsel should be heard on their behalf in support of their application, the undersigned (Mr. Lapointe) made an appointment for the hearing of argument, in exception to the ordinary procedure in consideration of an application for disallowance."

Premier Duplessis advised the provincial government would not be represented at the hearing. The petitioners were heard through Warwick Chipman and Charlemagne Rodier, acting as counsel for the Canadian Civil Liberties Union. Present also were Hubert Desautels, president of the Montreal branch of the organization, Professor Frank R. Scott and J. K. Mergler, Montreal.

Board Will Buy Wheat

Wheat Board Will Purchase From Farmers During New Crop Year

Ottawa.—The Canadian Wheat Board during the coming crop year will buy all wheat offered it, paying an initial minimum price to be fixed later by the board, and giving the farmer participating certificates entitling him to share in any profit made by the board in selling above the minimum price, it was indicated here.

Following a cabinet meeting, Prime Minister Mackenzie King announced the Wheat Board would purchase from the farmers during the new crop year, starting August 1, without limitations imposed on such purchases throughout the present crop year.

During the present crop year, the board fixed a minimum price of \$7½ cents a bushel, ratified by the government. Regardless of how low the market price might fall, the producer was to get that minimum.

Horse Epidemic

Deadly Brain Disease Plays Havoc In Manitoba And Saskatchewan
Winnipeg.—Widespread rains in western Canada have temporarily checked the encephalomyelitis epidemic, deadly brain disease killing Manitoba and Saskatchewan horses, the Manitoba department of agriculture reported.

Dr. Alfred Savage, animal pathologist, said the rains would settle dust, a main carrier of the disease he said has reached almost every section of the two prairie provinces.

Dr. Savage could give no estimate of the number of animals dead. "There are possibly 100 dead in Manitoba," he said, "but Saskatchewan's total is far greater."

Hardest hit area in Manitoba is the Russell district, 200 miles northwest of Winnipeg, near the Saskatchewan border. More than 300 cases have been reported, 50 of them fatal. Municipalities in the southwest are comparatively free from the epidemic because of wide use of preventative vaccine in early spring.

Summerfallow operations in southeastern Saskatchewan have been retarded in the Heward district, 90 miles southeast of Regina, 15 horses have been stricken fatally and 25 more afflicted.

Riots In Jerusalem

Eighteen Arabs And Three Jews Slain In Gun Battle

Jerusalem.—A bomb explosion in the business centre of Haifa followed by a running gun battle between Jews and Arabs killed at least 21 persons and wounded 40 others. The outbreak was one of the bloodiest in the long history of Arab-Jewish clashes in the holy land which each group considers its national and spiritual homeland.

Race rioting broke out during the evening rush hour when crowds were hurrying home. Witnesses said that after the bomb exploded police constables opened fire on the rioting crowds, causing a majority of the casualties.

One of the victims was Tuvia Doune, 55, well known contractor and brother-in-law of Dr. Chaim Weizmann, president of the British Zionist Federation. Official figures said 48 Arabs and three Jews were killed.

Origin of the bomb was not determined immediately.

Another bomb tossed from a moving train into a Jewish crowd at Tel Aviv killed a woman and wounded two men.

Must Import Grain

Britain Will Have To Depend On Empire For War Time Provisioning

London.—The government is determined to aid domestic agriculture to the fullest extent, but war-time provisioning of the United Kingdom must ultimately depend upon supremacy of the royal navy, Prime Minister Chamberlain told a parliamentary delegation.

The group called upon Mr. Chamberlain at the House of Commons to seek an explanation of a disputed passage of his speech at Kettering, in which he warned any attempt by Great Britain to grow all the food it needed would ruin those "empire and foreign countries who are dependent on our markets."

The prime minister prefaced his remarks with an expression of gratitude for the opportunity of clarifying certain errors of interpretation he claimed had been made by critics of his speech.

He insisted whatever the efforts to increase home production, the nation could not "reasonably" count on British self-sufficiency in foodstuffs.

Released On Bail

Sudbury, Ont.—Jacob Isaac Glick was released on \$10,000 bail when he appeared in police court charged with illegally transporting beaver skins from Algoma district to Rouyn, Quebec. Glick pleaded not guilty, and was remanded until July 25.

Elevator Destroyed

Leithridge, Alta.—Fire destroyed the Alberta Pacific Grain Company elevator at Woodhouse, 35 miles northwest of here. Between 800 and 900 bushels of wheat burned. Cause of the fire and total damage have not been determined.

BIDS FAREWELL

Mr. J. W. Collins, O.B.E., who is retiring as New Zealand Trade Commissioner to Canada, has given nearly eight years of invaluable service to the two Dominions. The Commissioner's energy and enterprise are largely responsible for the trade expansion of some \$16,000,000 between Canada and New Zealand.

Munitions From Canada

Britain Is Considering Placing Order For Explosives Here

London.—Sir Thomas Isakip, minister for defence co-ordination, announced in the House of Commons the British government is considering an order for explosives in Canada.

"As regards the production of aircraft," Sir Thomas said, replying to Sir Henry Page Croft, Conservative, "the government have under examination the report of the recent special mission sent to the United States and Canada, who made an inquiry into this matter."

"As regards the manufacture of other munitions, orders have been placed in Canada for shell bodies and Bren machine guns, the former direct with the Canadian manufacturers, the latter in association with the Canadian government. An order for explosives also is under consideration."

Frederick Bellenger, Labor: "Are the types of munitions for which orders have been placed in Canada similar to the type to be supplied the Turkish government under the bill before the house?"

The minister did not reply.

U.S. Railway Fares

Washington.—The United States Interstate commerce commission authorized eastern railroads to increase passenger coach fares from two to 25 cents a mile to go into effect upon 10 days notice.

BRITAIN PROVIDES UNIFORMS FOR VOLUNTEER WORKERS

The new A.R.P. uniform for the auxiliary firemen (left) consists of the A.F.S. single-breasted tunic, oilskin leggings, rubber boots, belt, axe, pouch and steel helmet. The type of uniform for women auxiliary firemen consists of blue gabardine waterproof coat, a blue beret with A.F.S. badge and rubber boots. With these uniforms the British Government hopes to attract new recruits to the voluntary services being inaugurated in the Mother Country.

Outbreak In Shanghai

Exploding Bombs And Assassins' Bullets Creates Turmoil

Shanghai.—Exploding bombs and assassins' bullets ushered in the first anniversary of China's armed resistance to Japanese invaders and threw the International Settlement into turmoil.

Three bombs were thrown simultaneously at a Japanese sentry post on Garden Bridge, a floating restaurant off the Bund—now used as Japanese gendarme headquarters—and the Yokohama Specie Bank branch, also on the Bund.

One Chinese was killed and another wounded. Police reserves and foreign defence units were called out to guard against more serious outbreaks of terrorism in China's commercial capital.

A cordon quickly was thrown around the foreign area, blocking all traffic between the International Settlement and Japanese-occupied territory.

An unidentified Japanese riding a bicycle in the International sector guarded by United States marines was shot and killed. His assassin escaped.

In Japanese-occupied West Hongkew, a part of Shanghai, a Japanese sentry was shot and killed by three Chinese who threw a hand grenade at a Japanese sentry post on the Yuyehing road bridge, linking the settlement with Hongkew.

Three bombs were tossed against a Japanese cotton mill on the settlement outskirts, and a few moments later three more bombs exploded in the mill's living quarters. One British Sikh soldier from India was wounded.

Japanese reported new gains over Chinese armies defending the Yangtze river approach to Hankow, China's provisional capital and goal of Japan's campaign.

Hansard Report

Ottawa.—The House of Commons Hansard for the recent session, which opened Jan. 27 and closed July 1, runs about 5,000 pages and the senate Hansard 700 pages, it was disclosed. Followers of parliamentary discussion estimated each page averaged 800 words, bringing the commons report to 4,000,000 words and the senate to more than 500,000.

Flood Takes Many Lives

Tokyo.—A disastrous flood surged through Kobe, principal port of western Japan, and reliable estimates placed the number of dead at about 480 persons. A Kobe resident telephoned to Tokyo that destruction was heavy. He said the final death toll might reach 1,500.

YEAR OF WAR HAS BROUGHT CHINA SERIOUS DEFEATS

Hankow, China.—Twelve months of war have brought China disastrous defeats, staggering losses, staggering appointments and the prospect of even greater distress in the year to come.

The year has cost China 500,000 of her best troops, parts of 10 provinces, most of her coastline with its ports through which flowed revenue-producing goods. It has cost her control of two-thirds of her railroad mileage and her greatest channel of commerce, the Yangtze river—but it has not brought China to her knees.

China derives hope from Japan's failure to obtain a local settlement after the initial clash outside Peiping last July 7. Hope also springs from Japan's failure, after breaking the Chinese army at Shanghai and driving the government from its capital at Nanking, to obtain a dictated peace. Finally, there are Japan's repeated failures to break China's united front.

The Chinese Nationalist party, Kuomintang, is working as a unit under the leadership of General Kai-Shek.

After a decade of efforts to discredit Chiang Kai-Shek and his government, the Chinese Communists, if not actually fighting side by side with the general's nationalists, are using their acknowledged abilities as political agitators and guerrilla fighters to prevent Japanese consolidation of gains in Shanghai province.

So far China has dipped only sparingly into the currency reserves she built up before the war. Another year, however, may force her into these reserves, unless loans and credits are obtained abroad.

Would Leave Austria

4,500,000 Ready To Escape Nazi Rule

If New Homes Can Be Found
Evian-Les-Bains, France.—An Austrian refugee leader told United States delegates he believed 4,500,000 Austrians would flee Nazi rule if a 32-nation conference could find them a new homeland.

Arthur Rosenberg, representing the Federation of Austrian Exiles at the meeting inspired by President Roosevelt of the United States to try to help German Jews and refugees, said about 75 per cent of Austrians would leave their country if allowed to take a substantial part of their property with them.

(The Austrian population in the 1934 census was 8,000,333. Various estimates put the number of Jews in Austria at the time of the Austro-German union at 200,000 to 300,000, and the total number of persons with some Jewish blood at 600,000—roughly 10 per cent of the population.)

The United States delegation, headed by Myron C. Taylor, former head of the United States Steel Corporation, took the lead in preliminary negotiations for settling the refugee problem—made acute by the Austro-German union March 13.

British Boys For B.C.

Estates In Okanagan Valley Presented To Fairbridge Farm Schools

London.—Fairbridge Farm Schools announced Captain J. G. DunWaters had presented to the British estate in the Okanagan valley of British Columbia to the schools.

The older boys at the Prince of Wales Fairbridge farm school will go to Finty for farming and training almost immediately.

Finty estate lies on the west side of Okanagan lake near Vernon and covers 2,500 acres. It was acquired by Captain DunWaters when he came to Canada in 1919 and he has used it for the raising of Ayrshires.

The farm is self-contained, being made up of range land, orchards, preserves of mountain goat and deer, and traplines. It has its own water development.

Captain DunWaters is popularly known as the "Laird of Finty." He was formerly a Scottish publisher.

Argentina, Bolivia, Paraguay, Uruguay and Peru have not a single motorcycle.

Automatic Observations At North And South Pole Predicted For The Future

Establishment of automatic robot weather observers at the North and South Poles, on mountain tops, and on isolated islands to predict the weather for a week or more without forecast by Dr. W. R. Gregg chief of the U.S. Weather Bureau.

Addressing the American Association for the Advancement of Science at its summer meeting, Dr. Gregg declared a new type of international scientific co-operation is emerging between Democratic, Fascist, Communist and other forms of governments to make the earth's weather less of a hazard in carrying on human activities.

The newest instrument for gathering weather data is the radio meteorograph, a device sent aloft by balloons which automatically registers its height, humidity of the air and temperature as it ascends into the stratosphere five miles and more above the earth's surface, Dr. Gregg declared.

Plans are already being made, he declared, to set up robot weather observers near the North and South Poles, on mountain peaks, and on distant islands near the equator to make similar automatic weather observations and send them by radio to a central weather observatory for transmission to all parts of the world.

Such automatic weather stations, which would make continuous records of atmospheric conditions, would be powered by electric batteries and would require rare inspections by passing ships or aeroplane visits, Dr. Gregg said.

Thus, the Soviet Polar expedition which drifted from the North Pole southward last winter to study weather and ice conditions, might have set up an automatic weather station and left it to do the laborious weather recording.

By the use of such instruments it would be possible for a radio weather station hundreds of miles away to contact the automatic weather observer, set it in action, and record its observations almost as easily as dialing a telephone number in a large city, the American meteorologist said.

Should such an instrument be drifting on an ice floe or on a special platform or boat, in which case the atmospheric conditions during hurricanes or other storm periods would be fully recorded—might be observed, it would be simple to determine its position at sea almost exactly by observing the direction from which its signals come at two or more stations on land, Dr. Gregg added.

Feed Up With News

This Reporter Wanted To Think About Something Else

We just thought we'd tell you that there are 48 nations in the world still at peace. A large number of autists drove safely and courteously through Vancouver streets yesterday. Several million Canadians are working and drawing regular pay cheques. We saw people laughing this morning. The mangle-wurtzel crop is good this year. Most people really like spinach. A girl and boy sat on a Victory Square bench at lunch-time yesterday, and lost track of the world around them as they looked in each other's eyes. This isn't news, but we thought we'd tell you. Sometimes we get so fed up with news that we like to stop and think of things like these—Vancouver Sun.

Hints For The Thrifty

A book on thrift contains the following: "It is practical to change the position of one's shoelaces at least twice a week. This way you can double the lifetime of your shoelaces and save money." Also: "If the sides of your box of matches are worn out while you still have a few matches in the box, strike the match vertically across instead of horizontally."

Ducks floating down the Niagara River frequently do not realize the speed at which they are drifting. Suddenly they are in the swirls near the brink of the Falls and go over to their death, unable to fly out of the thundering waters.

Nothing Really Happens

What People Call Prizefight Does Not Mean Anything

There are all sorts of theories as to the fascination of prizefights, and no doubt most of them are correct. The most intriguing of them is the notion that most of us would like to hit somebody and don't dare. This suppressed impulse is bad for us, though not so bad as giving way to it would ordinarily be. When we go to a prizefight we identify ourselves with one of the fighters. Then we identify the other fighter with the policeman who gave us a ticket, the man who shoved us aside in the subway, our employer, our venerable parent, who once spanked us unjustly, or perhaps with the New Deal, Wall Street, the capitalist system for the boy who went home from the church sociable 40 years ago with our best girl. We also make bets. Nothing makes one so vehement a partisan, or demands so little psychological analysis, as the act of laying a bet. Maybe the simplest explanation, as is often the case, is the least one. It may be immoral to win bets, but it is agreeable.

Setting all these considerations aside, a prizefight, or indeed almost any kind of athletic contest, has one supreme advantage. In a world and at a time when almost all the news we get is fraught with significance, the prizefight doesn't mean anything. It doesn't mean that the Nazi philosophy is good or bad, that the Negro race is or is not rising in the economic scale, or anything else. It has to do with such elements as muscular strength, courage, indifference to pain, sense of balance, reaction time and the like, which may be combined in any member of any race at any time. The heavyweight championship of the world is a fiction. Prizefighting is a business. The million-dollar crowd in the arena loses itself for a little while in enjoyable fury and suspense. But tomorrow will be exactly what it would otherwise have been. Nothing has really happened.—New York Times.

Chose Same Location

One Chinney Swift Returns To Old Nesting Ground

The Canadian Resources Bulletin says at least one Chinney Swift prefers to return to the same nesting site, each year. On October 19, 1936, at Atlanta, Georgia, a Chinney Swift, which was migrating with many others on their way farther south for the winter, was marked with official leg band No. 37-30249. This bird was caught and released at its nest near Sandridge, Ontario, about June 24, 1937, and it was again captured and liberated at the same nesting location about June 3, 1938.

This Swift makes long trips from nesting to wintering ground and vice versa. Comparatively little is known about the wintering ground of the Chinney Swift, but it is believed to be in the northern part of South America. Already many thousands of Chinney Swifts have been banded by ornithologists in co-operation with both the Canadian and United States Governments, and perhaps banding may ultimately tell all about Chinney Swift travels. Other species of native wild birds have also been banded in great numbers with a view to obtaining exact information relative to their general life histories.

Memorial Scholarship

An Amelia Earhart Fund To Assist Young Women

An Amelia Earhart Memorial scholarship fund was established by Zonta International at its annual convention at Banff, as it was recalled the renowned aviatrix had insisted on doing all in her power to aid advancement of aeronautics.

Before voting to establish the fund, the last letter Miss Earhart wrote to the Zonta club, to which she belonged, was read. Miss Earhart was lost in July, 1937, in the South Pacific while on a round-the-world flight.

The memorial fund will be for assistance of young women engineering students having a special interest in aeronautics.

Modern Highway To India

Motorists Can Soon Travel In Comfort From Bombay To London

The Indian Empire Press Union states that a modern highway linking Great Britain, Belgium, Germany, Austria, Hungary, Yugoslavia, Bulgaria, Turkey, Syria, Iraq, Iran, Afghanistan and India will soon be an accomplished fact and it will be possible to motor in comfort the 8,000 miles from Bombay to London.

At a luncheon given by the Western India Automobile Association in Bombay, H. E. Ormerod, president of the association, said it was proposed that the road which at present had been completed as far as Istanbul, except for a short stretch, should be extended through Anatolia and Syria, and then on through Iraq, Iran and Afghanistan to India, and in this manner through Delhi to Calcutta and Bombay.

A. H. C. Sykes, secretary of the association, said that in 1933 the Automobile Association surveyed the whole length of the route from London to Istanbul in collaboration with a British car expedition. With the enthusiastic support of the Alliance Internationale de Tourisme, a group of motoring organizations having over 10 millions, and with the wholehearted co-operation of the governments of the countries through which the route passed, the work of reconstruction and modernization was soon commenced. It has proceeded rapidly since and it is now possible to reach Istanbul from London in five days' easy motoring.

For Happier Homes

Making The Husband Take A Hand At Washing The Dishes

It is a husband's job, too, to cook the dinner, he should wash the dishes—and the result would be divorce depression and a boom in business, in the opinion of Mrs. Harriette Quisenberry, of El Paso, Texas, president of the National International Women's Executive and Professional Club.

Here, she said, is how it would work out: "Man, prone to look for the easiest way to do things, would quickly tire of washing dishes—and grumpy pants. He would go out and buy a mechanical dishwasher. Boom would go that business.

"And likewise would go the business in all work-saving gadgets, such as the latest thing in dishmops and grease cutters.

"A working wife would appreciate her spouse's recognition of his responsibility to help with the household.

"That would make for happier homes and less divorce."

It is always profitable to have an actress selling kisses at a fete, states an organizer. For one thing, it ensures that many wives will come along, when otherwise they might not have bothered.

A recent society wedding which cost only a few thousand dollars was described as a quiet one. The silence, as you might say, was deafening.

Mexicana--Vivid Simple Stitchery

Household Arts by Alice Brooks

Make Linens Sparkle With Fascinating Motifs

PATTERN 6085

"Way down to Mexico we go for sparkling motifs to embroider on tea cloth, luncheon set, scarf or towels! Select the most colorful flows you can find. You'll do them in no time for they're mainly a single shade and outline stitch. Pattern 6085 contains a transfer pattern of 16 motifs ranging in size from 1/2 x 1 1/2 inches to 4 1/2 x 5 1/2 inches; 30 stamps of 1/4 inch border; color scheme; and a list of materials needed."

To obtain this pattern send 20 cents in coin (stamps can not be accepted) to Household Arts Dept., Winslow Press, 175 McDermott Ave. E., Winnipeg.

Empire Migration To British Dominions Is Urged By Overseas Settlement Board

In urgent phrase the Overseas Settlement Board recommended action be taken without loss of time to encourage migration from the United Kingdom to the Dominions.

It dismisses any idea migration can be regarded as a solution for unemployment in the United Kingdom. From a careful survey of population trends the conclusion is drawn it is no longer axiomatic that extensive migration is in the interests of the United Kingdom if those interests could be considered in isolation from those of the Dominions.

The board was appointed in February, 1936, under chairmanship of the Marquess of Hartington, now the Duke of Devonshire, to advise the secretary of state for the dominions.

Its report pictures the Empire with a white population of 70,000,000, of whom about 40,000,000 are collected in the United Kingdom. While the total population of the world has expanded during the 20th century at a greater rate than during the 19th, the population of the United Kingdom was growing older in composition and unless the trend was reversed there would be almost immediately a decline in population at the younger working ages and, therefore, of those available for migration.

The dominions generally also show a rapidly falling birth rate, although there has recently been a slight recovery and they have amongst them the lowest death rates in the world, so their population, too, is steadily growing. The seriousness of the situation is obvious from the social and economic life of the community and also from the point of view of defence.

The report makes the novel suggestion that if the United Kingdom cannot supply settlers in sufficient numbers to provide all the additional population for which the circumstances of the dominions call, the admission of a carefully regulated flow of foreign immigrants of assimilable types, preferably from those countries whose inhabitants "sprung originally from the same stock as ourselves and who share our outlook in many directions, has much to commend itself."

"The incorporation of assimilable settlers, whether of northern or other European extraction, would itself be not only the source of permanent enrichment to the life of the dominions but would at the same time increase their capacity for absorbing immigrants from this country," the report goes on.

"It should moreover, lead to increased trade between those countries where immigrants go and the country in which they settle, and should thereby make a contribution towards what we regard as an urgent need of the world to-day, a more open door to trade and population."

The report recognizes the policy to be adopted in regard to non-British European immigrants is entirely

a question for the dominion governments.

Migration, it continues, should not be dealt with as a matter of bargaining. It should not be directly related to the question of increased markets for dominion produce, nor is it possible to set off introduction of immigrants against introduction of a given amount of capital.

Direct action on the part of the government of the United Kingdom for promotion of a flow of capital into the dominions would not be justified as a measure of migration policy. If opportunities for the investment of capital from the United Kingdom are to be created it must be as a result of the policy of the dominion governments themselves.

Rapid progress in secondary production in the dominions should have an important effect on the capacity of the dominions to absorb migrants from the United Kingdom, but every care should be taken so to direct any policy of assisted migration as to avoid giving the least cause for any apprehension on the part of Labor in the dominions that the standards of living are being endangered.

The board holds financial assistance under the Empire Settlement Act should not be given to organized schemes of land settlement and development, save in very exceptional circumstances and only then if the dominion government concerned approves the scheme and is prepared to co-operate financially or otherwise in carrying it out.

Reliance should primarily be placed on infiltration, namely settlement on land or otherwise of single individuals or families in already existing communities.

Migration, it is pointed out, is a matter of attraction, not compulsion, and if the dominions are to obtain the United Kingdom migrants they need, it lies with them to create conditions which will prove an attraction. The board also suggests that other social services in the United Kingdom have created a sense of social security and stability which militates against the inclination to migrate.

An Important Problem

Canada Should See That Rural Churches Are Maintained

The St. Mary's, Ont., Journal-Argus sees a scene in country communities changing, and tells this story. The average "country corner" to-day serves as an index of the change that has come over the rural community during the past generation.

In conversation with an aged lady who has spent her life in a neighboring hamlet, she recalled the other day that during her girlhood there were three taverns at this country corner. There were also three churches. To-day there are neither churches nor taverns. The blacksmith and wagon shop are gone but in this settlement, with a population of fifty people, there are no less than three gas stations. To-day the farmers have cars to get about in and the changed condition does not deprive them of blacksmith's service or the products sold by taverns which are within easy driving distance.

The institution that is really missed in the community, according to our aged friend, is the church. Of course people could drive to town to church just as they come to town for other reasons, but the fact is that in the community in question only two or three families go to church. The neighborhood is made up of decent and law-abiding people. A generation ago their parents were the pillars of the community church. They are benefitting in many ways from sound early training. But what about the children who are growing up in their homes? Are they losing anything vital by their lack of connection with the Christian Church? If they are, and we surely think they are, in the next few years Canada will begin to pay dearly for its lack of solution of the rural church problem.

There are no islands in the Pacific between Hawaii and the coastal region of America.

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using healthful Wrigley's Gum daily—as millions do. The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today.

WHAT HO!

CHAPTER XV.—Continued

She scanned the gilt-and-mirrored room. There was a profusion of Americans, a rich variety of Americans there, but not the one American she sought.

Lady Rosa took a table on the balcony commanding a view of the room, ordered a glass of sherry, a turbot bonne femme, and a salad, and kept watch. At a table below her a man emerged from the shadow of a wine card as big as a baby's blanket; and then she did see a familiar face, her father's. Opposite him was Mrs. Clara Martha Phelps, looking twice as patrician as the earl, and nearly as happy. Lady Rosa resisted the temptation to drop a lump of ice on her sire's pate. If they saw her they'd ask her to join them and she did not feel that she was good company just then.

A smacking sound made her turn. Behind her in a corner, alone at a table for four, a man was smacking his lips over a glass of Burgundy, and making ready to perform a major operation on a steak the size of a dictionary. The diner was rather sleeklike himself, with a medium rare complexion, porthouse frown, and a hamburger neck. On seeing Rosa he got up and rolled toward her, an avalanche of beef. Stopping at her table he said, "Lady Rosa Bingley?"

"Yes."
"Punder's my name."
"Oh, yes, Mr. Punder. I remember you, of course."
"Where's that Yank?" Punder shot at her.

"I presume you mean Mr. Ernest Bingley."

"That's just who I mean."
"I don't know," Rosa said.
"Hah! You don't, hey? Done a bunk, has he?"

"He has left Bingley Castle, if that's what you mean, Mr. Punder; and I believe he is somewhere in London. I don't know where. I wish I did."

"So do I," said Punder. "If I lay my hands on that dirty, little beggar—"
"Mr. Bingley is neither dirty, little, nor a beggar," said Rosa, warmly.
"Hah! Ain't he?" said Punder.
"Quite the contrary."

"That's what you think, said Punder.
"It is."
"Well, you're wrong. He's a fake. He's an impostor. He's a nobody without a penny to his name," declared Punder.

"I'm afraid, Mr. Punder, your steak has gone straight to your head," said Rosa.

"Hah, has it?" said Punder. "Well, one of my men just phoned me from Paris. He had a talk with O. G. Wyncoop. Seems Wyncoop is hoping mad because he's classed as an

undesirable alien on account of what his kid did here. Not—? threw in Mr. Punder parenthetically "that did Wyncoop isn't a robber himself—"

"I fail to see how this applies to Mr. Ernest Bingley."

"Oh, you'll see," said Punder. "The net of it is that Bingley is no more a millionaire than that fish on your plate. He's just a country bumpkin that stuffs pet canaries for a living in a village in Iowa, or Ohio, or Ohiooo or some such place. But he's a sty cove, and he sold up his shop to come over here and try out some of his cute games on us slow Britishers. Well, he took me in. To the tune of twenty thousand pounds—"

"Are you accusing Mr. Bingley of stealing?" asked Rosa, pale as the table-cloth.

"No. Not exactly," said Punder. "He broke no law, or I'd set Scotland Yard on him. It was a legitimate enough business deal, no shadler than many another. He caught me napping. Fooled Pete Tyler, too. Pete didn't lose anything, but I did. I don't mind the twenty thousand quid, of course; but I hate being stung. I got pride. And when I catch up with young Bunco Bingley he'll feel the weight of my beetle-squashers."

Mr. Punder brandished a size 12A shoe.

"Are you sure, Mr. Punder," said Rosa, quietly, "that Mr. Bingley has no money?"

"Of course he has," said Punder. "I don't I just tell you he short-changed me out of twenty-thousand? I don't quite see why he made me hand over those notes instead of cash. Of course, by now, he's had them discounted, and has probably lit out for Paris."

"That's what you think," said Lady Rosa.

"Huh?"
She did not explain.
"Mr. Punder," she said, "have you no idea at all where he might be?" Punder began to wheeze with gusty laughter.

"What did the rascal do to you?" he asked.

"That's my affair, I think."

More laughter shook the portly Punder.

"Sorely, but I don't see the joke," said Rosa.

"Ho ho ho!" chuckled Punder. "That little knave doesn't miss a trick. Takes 'em all, high and low, in his stride. Well, as we're in the same boat, let's join forces."

"No, thank you."

"Well well. I'll hunt and you hunt. But if I find him first—"

"You'll grind his bones to make your bread, I suppose."

"Ho ho ho!" roared Punder. "That I will, if you get on his track, just ring me up at my Park Lane house, will you?"

"Yes, if you'll notify me the minute you find him."

"It's a bargain."

"I'm staying with the Countess of Bathurst in Osnow Square," Rosa told him. "And now, Mr. Punder, hadn't you better get back to your steak?"

"I expect so," said Punder. "Do you like hash?"

"Yes, why?"

"That's what I'm going to make out of E. Bingley," said Punder, and returned to his steak.

Lady Rosa was sipping her coffee when she heard a voice call out.

"Yoo hoo, Rosa, you hoo!"

Her father, on his way out of the restaurant, had spied her.

She waved her napkin at him.

"I'll come up," yelled the earl, to the surprise of the sedate diners.

Come up to the balcony he did, and Clara-Martha Phelps came with him.

"Rosa," he said, "meet your mother."

Mrs. Phelps giggled.

"I mean to say," went on the earl, "she's going to be in a few months."

"Bless you, my children," smiled Rosa.

"We're to be married in Vienna," said the earl, "just as soon as Clara-Martha finishes her psychoanalysis. Then ho! for a honeymoon in Venice and back to Bingley Castle in time to water the tulip bulbs."

"I congratulate you both."

Mrs. Phelps placed a kiss on Rosa's ear.

"I've always wanted a daughter," she said.

"I say," said the earl, "any trace of old Ernest?"

"I haven't found him," Lady Rosa said, "but I've found him out."

"Eh! Riddles!" said the earl. "Tell

me the answer quickly. We're late for the party."

"Tell you later. Run along now."

"Come, ducky," said the earl, giving his arm to Mrs. Phelps.

"Yes, Georgie-porgie," said Clara-Martha Phelps.

When they had gone, Rosa summoned her waiter.

"Please tell Max that Lady Rosa Bingley would like to see him for a moment," she said.

"Very good, m'lady."

Max presently approached her table. He had the air and profile of an emperor entering Rome in a triumphal chariot. Max spoke nine languages, and knew enough about the British nobility, it was said, to make a fortune by blackmail, if he were so inclined. He wasn't. He preferred to be the major dome at Nero's. Besides, he had a fortune.

"Good evening, my lady," he said.

"May I offer you my felicitations?"

"On what, Max?"

"On the successful culmination of his lordship's romance."

"Max, you know everything," laughed Rosa.

"I regret I do not know where you can find Mr. Ernest Bingley," Max said.

"How do you know I want to find him?"

"A little bird—"

"Meaning my father?"

"Yes."

"Max, let me pose a question."

"Please do, my lady."

"Suppose you were in London—"

"I am."

"And broke—"

"I have been."

"What would you do? Where would you go?"

"Meaning me, or a hypothetical character?"

"Meaning a young American."

Max gave thought to the matter, as if he were Tiberius considering a matter of state.

"He is without funds?" he queried.

"Practically. Nothing but a return ticket to the States, I think."

"What I did," said Max, "when I first came to London as a young man, and a very poor young man, was to sit on a bench on the Thames Embankment and plan how to become a rich one. On the benches there, my lady, one finds many who were rich, and some who are going to be rich."

"I'll try there," said Rosa, getting up.

"Surely not alone?"

"Yes."

"It is a vile night."

"No matter. Thank you, Max."

"Always at your service, my lady."

Rosa paid her bill and stepped out into the fog.

(To Be Continued)

Provided New Words

Several Things Have Been Named

After England.

According to So You're Going Magazine those amiable Englishmen who write to the newspapers have discovered a new one this year: Namely, what English peers have had their names turned into new words in the language? One begins, of course, with the Earl of Sandwich, who wouldn't leave the gaming table, ordered some meat between bread slices brought in, and achieved an unexpected fame thereby.

But there are apparently quite a lot of others, including the seventh Earl of Cardigan, who got a sweater named after him, the Duke of Wellington, who ended up as a pair of boots and a cooking apple, and a certain Crimean war general named Baggie, who turned out to be an overcoat.

Mechanized Viewpoint

Modern transport, press and film are creating in England what Earl Baldwin describes as a "standardized suburban mechanized mind." We already have too much of that here, states the Farmer's Advocate. Rural people accept all too placidly the urban viewpoint, and wholesome rural independence is becoming inarticulate.

A stone coffin containing laurel leaves and a skeleton believed to be that of a 13th century abbot was discovered in the ruined chapter house of the monastery at Ashbroath Abbey, Scotland.

It is reported that a light sprinkle of rain makes the average road one-third more slippery than a drizzling rain.

FOR ANY TYPE OF HOUSE

Might Reverse Decision

Question Whether Judge Would Apply Case To Himself

A recent legal decision in the United States has fallen upon jaded sports writers like manna from heaven. It appears that the umpire at a ball game in a West Virginia town called a strike. The batter felt differently about it, made a verbal protest and followed it up with a punch on the nose. The umpire took the case to court.

After hearing the testimony, the judge dismissed the case with the remark, "It is the inalienable right of a baseball player to get mad and have a fight with the umpire."

The judge had had his little day, but we are wondering what his reaction would be if some litigant in his court exercised his inalienable right to get mad at a decision and took a punch at the judge himself.

Perhaps it might occur to the umpires' league to make a test case—Winnipeg Tribune.

Near Sea Tragedy

Nova Scotia Fishermen Are Rescued

By Danish Freighter

Two Yarmouth fishermen saw the flag of their vessel lowered to half mast in mourning for them. The pair, John Jacquard and Burton Hemlow were dormyates aboard the Yarmouth schooner R. B. Hutt.

The Hutt left Yarmouth for the Grand Banks. When she got there, the men perished in dories and started sailing. Jacquard and Hemlow got lost in dense fog, and after drifting two days were picked up by the Danish freighter Gyda, bound for New York.

The Hutt searched for two days and failing to find the men, returned to port with a tale of tragedy. Six hours later their shipmates returned to Yarmouth—by automobile. The freighter landed them at Cape Negro, N.S., near Yarmouth.

Underground Post Office

South Australian Opal Field Has Only One In World

Cooper Pedy, the remote South Australian opal field, possesses the only underground post office in the world. The prospectors live in "rooms" dug into the soft earth of the low sandstone hills. Here, too, is their bank and their post office. Cooper Pedy, is the aboriginal name for white man's burrow.

A psychologist says it is no wonder school children write "boners," since words in English have so many definitions; for example, game has 15 meanings, grain has 30 fall has 29 and account has 34.

Lizards are slimy to the touch, but snakes have dry scales.

Confirmation Service Next Sunday.

At the Glory Hills Evangelical Reformed Church, on Sunday next, July 17th, the following young people will be confirmed at the regular church service by the pastor, Rev C. H. Reppert—

Paul Miller	Elizabeth Weitzel
William Bauer	Olga Schwindt
Henry Traut	Minnie Vogt
Raymond Reppert	Helma Traut
Anna Spady	Leah Doering

Stampede at Duffield on Monday.

The big attraction billed for Duffield on Monday next July 18 is sure to attract attention. Mr Edgar Oleson will bring his unrivalled Stampede and Carnival to Duffield on the date indicated.

This will be the best show of its kind yet seen this far West, so it is claimed. There will be contests of every description usually seen at a Rodeo, including steer riding, bulldogging, bucking horse riding and roping contests. The show starts at 12 noon.

A dance is billed for the evening. For further particulars, see posters.

Searle Precipitation Report No. 6.

(Compiled from 182 Rain Gauge Reports.)

Taking into account the precipitation that occurred last autumn during the months of Aug. Sept. Oct. and the rains which have fallen this year from April 1 to July 1, and weighing for wheat acreage, the records reveal that the moisture condition for the 3 prairie provinces as a unit to be 86 p.c of normal, as compared with 90 p.c three weeks ago and 65 p.c for July 2d a year ago.

The moisture condition in Alberta July 1st was 90 p.c. of normal as compared with 74 same time last year.

Since July 1, the date upon which this compilation was made, unusually heavy rains have fallen over large areas in the West. The actual condition, therefore, at this moment, over the whole West, is probably now nearer to 90 p.c 90 p.c than the 86 p.c indicated in this report.

Chicago Institute of Diesel Engineering.

We are selecting a few mechanically inclined men to take a training in Diesel Engineering. Excellent opportunities for those who can qualify themselves to enter this fast-growing field. We will be pleased to forward information to those interested. Write stating age to Box 248, Calgary, Alta.

Enders--Mayer.

At St John's Lutheran Church, Blinberry, on Sunday July 10th, Miss Elsie Mayer, daughter of Mr and Mrs Jac Mayer, Jasper Hiway, became the bride of Mr Emil Enders, son of Mr and Mrs Louie Enders, Blinberry district. Rev H Karing, the pastor, officiated.

Those who acted as bridesmaids were Miss Martha Mayer and Miss Lucy Enders. The groomsmen were Messrs Ned Enders and W A Mayer.

Following the ceremony the happy couple left on a trip to the Coast.

Sporting Notes.

At the Bright Bank picnic last week the Stony Intermediate baseballers did fairly well—winning 1 and losing 1. They won from Holborn 5—1, and lost to Bright Bank 6—7. Heep Hills team failed to put in an appearance and Holborn took their place, losing to Bright Bank by 3—7. The games were refereed by Messrs Ed Zahn, E Dickie, Alb. Ducholke.

At the same picnic the Stony Senior basketballers won from Bright Bank by the score of 8 points to 2. Mr Ph Enders refereed.

Stony's Intermediates played the Winterburn team on the latter's diamond on Sunday, with the result that Winterburn won 16—4.

Stony Plain Senior ball team kept up their winning streak at their game on Friday at Spruce Grove. They won 6—3. Ed Enders and O Dreitz, battery.

Onaway baseballers played Stony Seniors here on Sunday, with the result that Stony team kept up its winning streak, defeating the visitors 6 runs to 3. Stony battery: Enders and Dreitz.

'Tis a matter of general comment among ball fans now that, any time our fielders make up their minds to assist the pitcher, their team wins.

Mr Dreitz took his team up to the Onaway tournament this week, to make it five straight wins.

Stony Plain and District.

Mr Otto Hoffman took a motor party down to Calgary Sunday, consisting of M McKinlay, A Graden and W Carmichael. They have gone down for the big Schuetzenfest at Sarcee. Before leaving, Mr Hoffman had a radio installed in his Pontiac sedan.

Messrs Edw Mayer and Oscar Oppertshausen left Sunday on a three-weeks' visit to the Coast, going thru Spokane.

Miss Margaret Gannon and Miss Thelma Larson are holidaying this week at Edmonton Beach. The "Twins" are with them.

Mr and Mrs Max Kast are expected home tomorrow from their motor trip to Jasper.

Miss Margaret Gannon and Miss Thelma Larson are holidaying this week at Edmonton Beach.

Mrs Nelson Kingdom, who had been visiting here with her mother, returned on Monday to her home at Westlock.

Mr Jac Becker, manager of the Pool elevator, will leave Saturday for a motor trip to Lloydminster, stopping on the way to visit friends at Josephburg and Scotford.

A new 18-foot platform scale will shortly be installed at the local Pool elevator, which will accommodate all sizes and weights of laden trucks.

BUTTER AND EGGS WANTED AT The Royal Cafe.

Spruce Grove News.

One of the best basketball games seen here was played Sunday, when Spruce Grove girls played the team from Garden Valley. The Grove had a particularly strong team and beat the visitors 34—16.

Mr Ted Lentz, the popular garageman, returned Sunday from a motor trip spent in the South country.

The Grove's baseball team took a rest Sunday. They attended the tournament at Onaway on Wednesday.
